

i have enjoyed XM satellite radio for over a year now. i appreciate the variety of programming and commitment this company has expressed to the public. i completely stopped listening to radio until xm came along, and i am pleased to pay for this service because of the high quality of programming choices, including the traffic and weather channels.

i hope that you will reject NAB's petition 04-160, and allow us to continue to pay for what we want to hear.

thank you.
